Educational workshop:
My Dream Society

What is your dream society?

How does it look like?

Do you have a responsibility in creating it?

THERE ARE EMERGING and ongoing wars that destroy lands and nations. There is the continuous dilemma of inequality, discrimination and other social issues that despite the modern trends and rapid technological advances of the society are still haunting and dividing the members of the society. In recent decades, development has created a number of common problems that challenged the possibility of building a decent society. Does the perfect society exist? Maybe not physically, but in our minds we all hold on to our dream society.

Democracy is in decline. We see how strong leaders are taking the initiative in several countries. In other countries democracy is something we take for granted.

The UN Sustainable Development Goals - Agenda 2030 - is a plan of action for people, planet and prosperity. The aim is to end poverty and to heal and secure our planet. We are all part in creating this goal. As we embark on this collective journey, we should all take the bold and transformative steps which are urgently needed to shift the world onto a sustainable and resilient path we pledge that no one will be left behind.

What does your dream society look like? We build this together in a workshop with teachers from Kalmar County Museum. We reflect, discuss and problematize about what an ideal society is. The workshop is based on democracy, human rights and the United Nations Convention of the Rights of the Child. In the last section we tie it all together and discuss how we can affect and how our personal responsibility looks like.

COST AND PRACTICALITIES

The workshop can be tailored according to target group and length.
